

# Universal Welding Gloves

Issued October 2020 • Index No. AYM/47.0 UK

**Welding Safety  
and Health** 

## Quick Specs

### Materials

Goat suede leather  
Goat grain leather  
Cow split leather  
Kevlar® lining  
Kevlar® thread

### Standards

EN 420  
EN 388:2016  
EN 407  
EN 12477:2001

**Category** II

**Size** 8-12

**Packaging** 12 (pack) / 60 (box)

High Quality

**Miller® gloves are designed to endure daily abuse prevalent within welding environments. Carefully selected materials and craftsmanship result in a glove that welders will want to wear, reducing the risk of hand lacerations and boosting productivity.**

Miller® Universal welding gloves fully made in specially treated leather making the gloves both water and oil repellent. Goat suede leather in the palm with full index finger reinforcement. The upper hand in goat grain leather. 15 cm long cuff in heat resistant cow split leather for added protection. Durable double stitching with heat resistant Kevlar® thread in all areas exposed to wear and tear. An elastic seam in the wrist provides a safer fit. Fully lined with a 180 grams brushed Kevlar® lining. The brushed lining increases comfort but also has insulating properties. This means that the glove can be used outdoor in colder weather without using an extra glove as a liner.

The material used in the Miller® Universal welding gloves has been carefully selected to ensure a long life. The gloves offer the protection needed during heavy duty MIG/MAG welding combined with the dexterity required for TIG welding.
